Jewett Construction

Project Completed

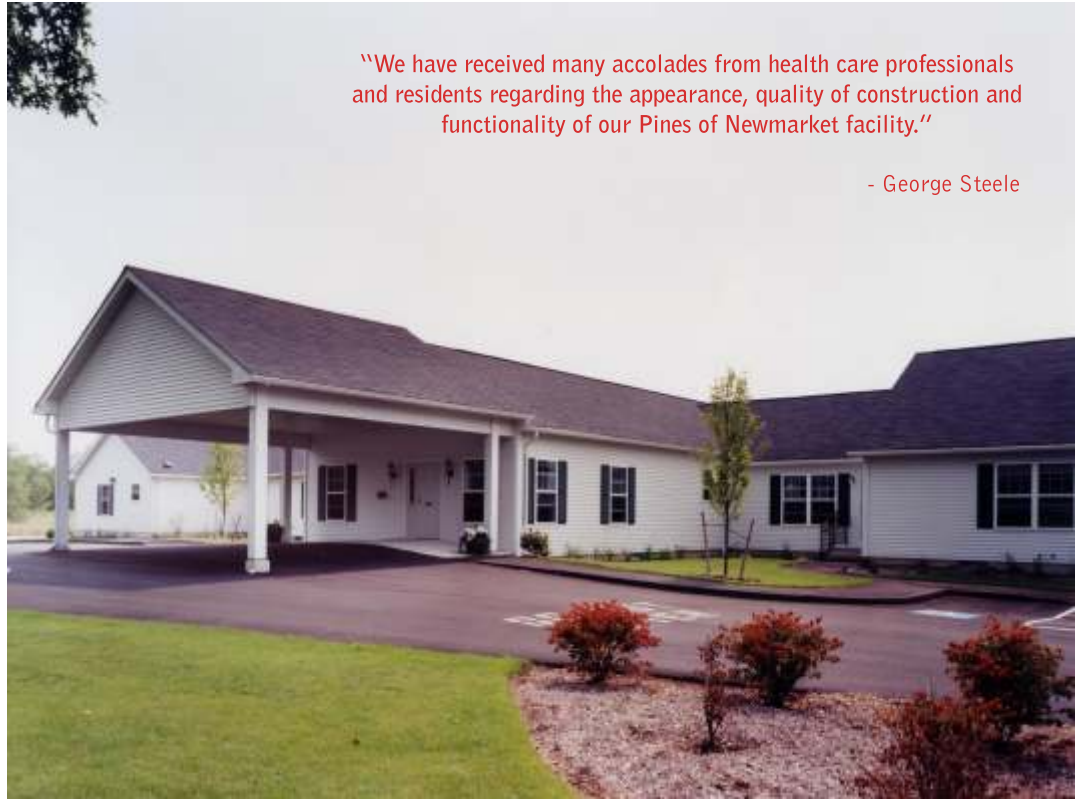

May, 1999

Building Type

Assisted Living Facility
New Building

Construction Method

Design Build / Construction
Management

"We have received many accolades from health care professionals and residents regarding the appearance, quality of construction and functionality of our Pines of Newmarket facility."

- George Steele

This fifty-two bed assisted living facility was constructed in twelve weeks, utilizing modular construction. Included in the facility are function rooms, activity rooms, full kitchen and dining services, as well as resident service areas and administrative offices. The site presented major challenges because of wetlands and other issues. Jewett Construction acted as construction manager and provided a major design contribution. This project was completed under budget, and delivered ahead of schedule. An addition was completed adding four more beds in August 2000, and Jewett is currently working on a new addition to be completed in January of 2002.
